

SFC Energy Product List

Pure hydrogen fuel cell.: Since it is a generator using pure hydrogen, it emits zero carbon dioxide. In addition, the output power size of the product is as high as 2.5 to 50 kW, so it can be used as a backup power source for large equipment.

Main application: Backup power supply in the event of any disasters

Product	EFOY Hydrogen Fuel Cell 2.5
Fuel cell type	Polymer Electrolyte Fuel Cell(PEFC)
Power(W)	2500W
dimension(cm)	53.6 × 48.3 × 31.1
weight(kg)	27
Voltage(VDC)	48
Operating temperature(°C)	-33°C~50°C
Noise (db) @1m	46
Fuel consumption (KWh/L)	3
Fuel	Pure hydrogen
Regulations	ask
